

Screening/Court Details

CentreJust provides for the complete capture of case details and filing dates including seven different related case numbers, notes, accused details and associate details for advocates, managers, prosecutors, and attorneys. Notes can be added for more detail to every screen.

Related Persons

Details for all related persons can be maintained in CentreJust including unlimited phone numbers and address types. Data driven lookup tables provide you with the flexibility of defining your relationship types as well the types of phone numbers and addresses to be used in the system. No additional data entry is needed for repeat related persons such as police, prosecutors, or advocates. Once in the system, they can be selected for association with a new case.

The Related Person Details user interface.

Charges

CentreJust comes preloaded with over 200 charges, including NIBRS associations. Additional charges can be added to accommodate your county specific needs. Disposition notes can be added for each charge within a single case. Reporting and entry can use either NIBRS or State charges.

Security

CentreJust has five levels of security: 1) physical, 2) database, 3) application, 4) module, 5) user level to provide maximum data security. Each user must be given specific module level access to be able to use the system as well as have a valid login account. Auditing is implemented on all components in the system to provide details of breach attempts and change tracking. With two simple steps: user and functional setup - users can quickly be able to use the CentreJust Court Case Management System.

Event Tracking

Tracking of multiple events are available in CentreJust for case filings, file notes, forfeiture review dates, court events, and post closing events. Dates, related persons and details as well as notes for each event can be entered for detail tracking. All event types are data-driven based on your custom needs.

Reporting

CentreJust reporting includes Pending Cases, Activity Historical Reports, and Court Schedule reports for all case types with multiple options for data selection. In addition, administration reports can be generated for data lookups, user lists, and summary lists. The CentreJust team can add customized reports or provide tools from six different vendors to provide for your custom report needs.
